WHEREAS, Section 21 (d) of Republic Act No. 7160, otherwise known as the Local Government Code of 1991, provides that: "any city xxx may, by a duly enacted ordinance, xxx regulate the use of any local street, road and thoroughfare";

WHEREAS Section 458 of Republic Act No.7160, otherwise known as the Local Government Code of 1991, states, that: (a) The sangguniang panlungsod, as the legislative body of the city, shall enact ordinances, approve resolutions and appropriate funds for the general welfare of the city and its inhabitants pursuant to Section 16 of this Code and in the proper exercise of the corporate powers of the city as provided for under Section 22 of this Code, and shall, approve ordinances and pass resolutions necessary for an efficient and effective city government.

WHEREAS, MMDA Memorandum Circular No. 01-2003 states that the presence of road humps along major roads has been identified as one of the major causes of traffic obstruction in Metro Manila, therefore, the removal of road humps in the streets and avenues has been part of their program in the clearing operations.

WHEREAS, the aforementioned circular also states that in the event that there is a compelling need to construct any hump, concerned groups are required to secure the recommendation of the Local Government Unit where the hump will be constructed.

WHEREAS, the use of this traffic-calming device is arguably effective in our streets because;

1. It can effectively reduce vehicle speeds ;
2. It may reduce traffic volume a little if there is a high volume of cut through traffic.
3. It protects crossing pedestrians from speeding vehicles.

WHEREAS, although the construction has succeeded in compelling drivers of motor vehicles to slow down and avoid accidents, the flip side is that these humps are themselves sources of some fatal accidents on the road and pose significant danger due to the following;

[Handwritten marks: a checkmark, the number 5, and a signature]

1. its placement is not strategically studied accordingly
2. its physical design is poorly constructed
3. it does not have pavement markings to make it visible on surface roads.
4. it is not accompanied by warning signage.

WHEREAS, most erection of these traffic-calming devices continue to be done without professional expertise and so they construct those speed checks haphazardly and continue to be unauthorized by the national and local government, and therefore are in need of regulation or prohibition.

NOW, THEREFORE,

BE IT ORDAINED BY THE CITY COUNCIL OF QUEZON CITY IN REGULAR SESSION ASSEMBLED:
